Powering and securing high theft electronic accessories.

Zips Power™ is the perfect solution to provide power and security to small electronic accessories, such as Bluetooth speakers, headphones, smart watches, GPS and other devices. Zips Power can meet current and future power up needs of electronic accessories and contains an internal rechargeable battery to maintain security if store power is lost and sensors can be detached to support daily removal for added security at night. Zips Power is an ideal product for retailers that sell small CE devices and electronic accessories.

InVue®

Easy to use and simple to install.

Zips Power™

ACCESS MANAGER™

Access Manager helps reduce internal theft by logging every InVue device interaction for every associate, making it easy to detect associate activity that is suspicious. Through its intuitive user interface, individual associates can be enabled with access to the entire store, a department or individual InVue device. Access Manager works with both Zips Power and Zips Power Multiport.

OneKEY is the data conduit that allows Access Manager to provide you the knowledge of who accessed a position and when.

1
OneKEY is deauthorized with employee PIN on Key Authorization Station

2
Data is immediately pulled and stored in the Access Manager Controller

3
Daily activity viewed via Access Manager Interface
