

## RAC Lock

# Physical security and access control for server racks

### **SIMPLE**

InVue's RAC Lock does not require any power or networking cables inside the data center.

### **SCALABLE**

Cost effective and easy to install 1 up to 1 million locks onto new or existing server racks.

### **SECURE**

The RAC Lock prevents unsecured racks by forcing the user to completely engage the door and lock before the key will lock the handle.

Easy to install, low maintenance and cost effectively scalable for new installs or existing server racks

**FEATURES AND BENEFITS**

- 1 Easily add new locks without any additional power or data infrastructure; reducing the cost of adding locks to the system
- 2 InVue's OneKEY collects data and allows you to see who accessed what, when and where across your environment
- 3 Set up user profiles and zones to control user access with in the entire site down to the specific individual lock levels
- 4 The OneKEY has multiple security measures to prevent un-authorized access through adjustable timeout and login attempts and control user-based or zone-based access
- 5 Integrated door sensor and latch sensors ensure that door is secure before the handle will lock
- 6 Easily layer RAC Lock into existing physical security systems and integrate InVue's Access Manager data into existing access control systems
